## ABOUT ME

I am a passionate front-end developer with a strong grip on React and Next.js core concepts. Developed and implemented solutions for e-commerce, bookings, and CMS sites using modern CSS, effective state management, rest, and GraphQL and google/leaflet/mapbox APIs. I have a solid foundation in key programming concepts and am eager to learn and grow more in this dynamic field.

## KEY COMPETENCIES

React.js	Next.js	React Native	Expo Go	Redux/Redux Toolkit	Maps Api's	Digital Payments
MUI/Tailwind/Sass	Git/GitHub	Web Sockets	Restful/ GraphQL Api's	JS (ES6+) / Ts	Authentications	Animation lib

## PROFESSIONAL EXPERIENCE

### QUBITLAB – Johar Town

November 2023 – present

Front – End Developer

Beauty Parlor Booking Website

- Utilized **Next.js** to develop a dynamic booking platform for a beauty salon leveraging SSG, CSR, and SSR for better SEO.
- Implemented efficient state management with Redux and Redux Persist for seamless user booking flow.
- accomplish **user authentications** using jwt tokens managing user profile and complete user dashboard.
- By using power of Tailwind css and MUI made the website responsive for different device sizes.

Mobile App for Car Parking Company

- Created a feature-rich mobile application using **Expo** and the **Google Map API**.
- Integrated **WebSockets** for real-time parking updates user can see available slots at different parking points and can make pre-bookings and pay for their reservation through **Stripe** payment.
- Implemented robust user authentication for enhanced security, redux and redux persist for state management.
- Application is deployed on app store and also on google play store by me using expo CLI.

React Dashboard for Parking Management (Spark)

- Developed a comprehensive dashboard with **React.js** and **Chart.js** for visual data representation.
- Utilized WebSocket's for live data updates and improved user interaction.

Landing Page for Construction Company

- Designed and developed an engaging landing page for a construction company, showcasing their services and projects effectively using tailwind Css, beautiful animation and more

### VOLTQUNAT - United Kingdom

Feb 2022 - December 2022

Front - End Developer - Remote job (Contract)

- Developed and implemented Figma design into a react dashboard using react.js, redux, **leaflet map**, **HubSpot**, **stripe Api**, and Auth0 for an electricity supply company in UK.
- The whole project is deployed on **Aws** and live - voltqunat.uk

### ALASAM - Travel Dashboard

- Made a front-end for booking air-flight tickets, user can search flights between 2 locations select departure and return dates and can see and reserved available slots. I have integrated 20+ filters to see the desired results
- The project is developed using free flight api provided by Amadeus.com

### PARTYSHOPE.COM

- Developed the fully functional Next.js e-commerce website implements **WordPress rest Api**, SSG, static path and props generation for better SEO and speed
- Retrieving products, categories, placing order handling user account and mobile responsiveness using sass.

### IDCPK.COM

- Design and deployed the react website using owl css for the industry equipment supply company
- Project is deployed on vercel and live - idcpk.com

### LUBANA STORE - Messenger Bot

Ecommerce bot developer - Contract

- Using **Facebook messenger API** I have deployed the custom messenger bot to respond promptly to user messages to get shipping and order details from the user
- this is a **node.js express server**, built over the Facebook developer app
- The project is deployed on vps and under development - trekhills.com

## EDUCATION & CERTIFICATIONS

Bachelor of Electrical Engineering (Information Technology University, Lahore)

Majors: Mathematics, Programming & Engineering
